

# How has Airbnb in London been affected by Covid-19?

Data: 2019, 2020, 2021 Airbnb Review/ Listing Data

DSO510 Final Project - Team 10

Chin-Kai Huang / Yi-Ching Lin / Shih-Ting Liu

Liang-Chi Liu / Sih-Yu Huang / Hsuan-Ting Wu

## Findings

- 1 Area:  
The demand, supply and price in the center of London decrease the most after the outbreak of Covid-19
- 2 Room Type:  
The price of hotel room differs the most after the outbreak of Covid-19
- 3 Review Content:  
Lockdown leads to more negative comments
- 4 Host Type:  
The number of superhosts decreased while its quality declined slightly

# Introduction - Business Problem

- Airbnb is an **online accommodation rental platform** that allows people list, find and rent short-term lodging
- Before the COVID-19 pandemic, Airbnb has **disrupted the hotel industry**  
Millions of guests and hosts are continually growing
- However, the **pandemic has triggered an unprecedented crisis** in Airbnb

How has Airbnb in London been affected by Covid?

—— Area | Room Type | Review Content | Host Type ——

# Introduction - Dataset

## Before COVID

outbreak (2019/11)

## After COVID

outbreak- UK 1st lockdown (2020/06)

## After COVID

outbreak - UK 3rd lockdown (2021/02)

### Listing

- ID
- Score(Overall/Subcategory)
- Price
- Room Type
- Host Type
- Response Rate

### Review

- Listing ID
- Date
- Comment

# EDA-Area

## Demand

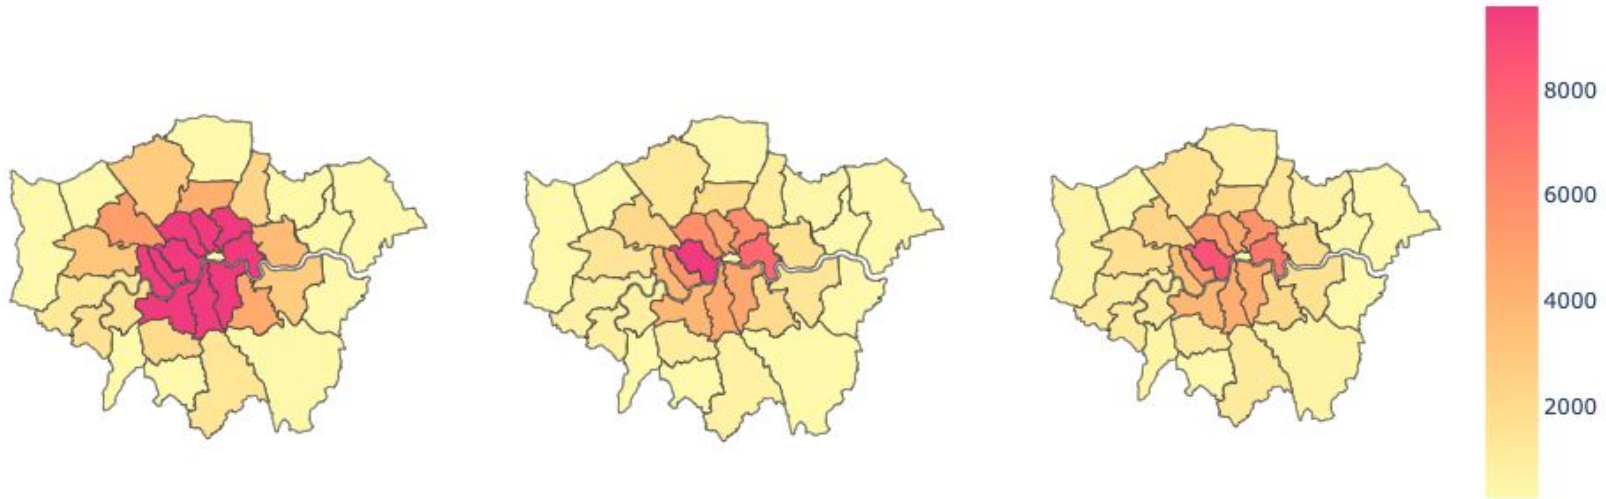

- The areas in the center of London have the highest monthly demand at all time
- Monthly demand **decreases** after the outbreak of Covid, especially the areas in the center of London

# EDA-Area

## Supply

- The areas in the center of London have the highest supply at all time
- Supply **decreases** after the outbreak of Covid, especially the areas in the center of London

# EDA-Area

## Price

- The areas in the center and southwest of London are the most expensive at all time
- Price **decreases** after the outbreak of Covid, especially the areas in the center and southwest of London

# EDA-Area

## Review Score

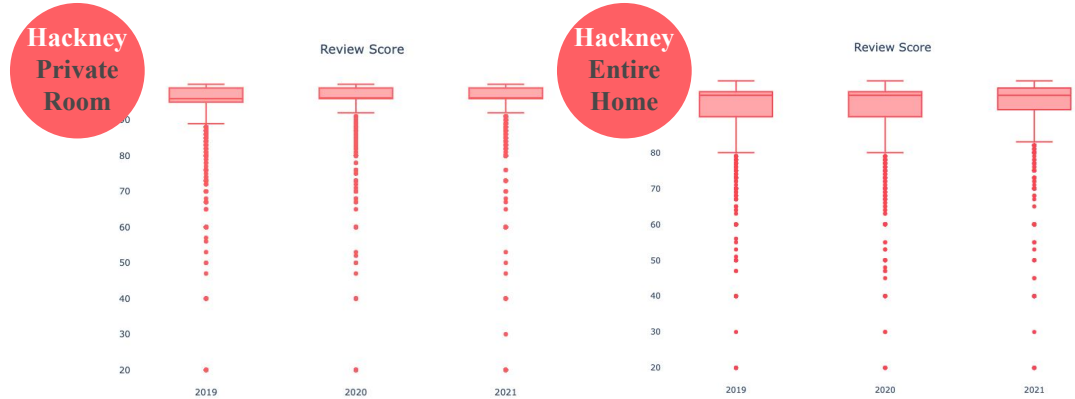

- The differences of review score between different areas decrease
- The changes in average review score does not follow the certain pattern, so we cannot assure whether Covid has impact on review score

# EDA-Room Type

## Review Score

In each area, the review scores of different room types did not differ a lot before and after the outbreak of covid

## Price

In each area, the price of **hotel room** may differ greatly before and after the outbreak of covid, especially the hotel room in Southwark. However, the price of other room types did not differ a lot

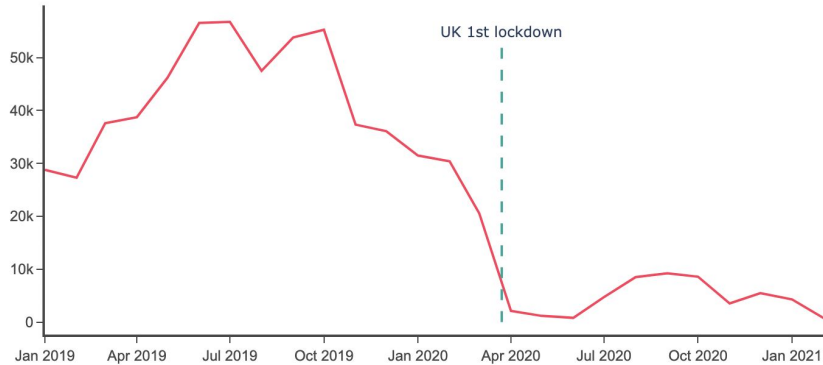

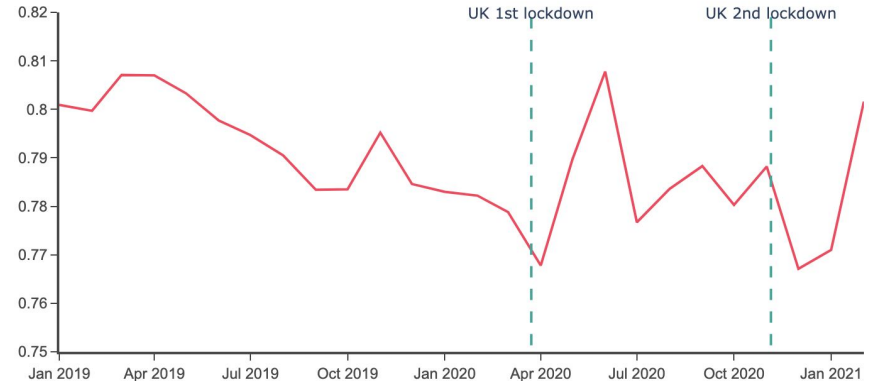

# EDA-Review Content

- Lockdowns lead to a **decrease** in Airbnb's demand
- Customers tend to leave a more negative comment right after lockdown starts

## Number of Review

## Average Sentiment Score

# EDA-Review Content

- Due to covid, more customers choose Airbnb as their destination for staycations
- Demand for conducting online meetings in Airbnb **increases**

## Trend of 'Staycation'

## Trend of 'Zoom'

# EDA-Host Type

## Overview

Number of hosts:

- Host: The number of normal hosts remained consistent, dropping slightly in 2021
- Super Host: Superhosts shrank in 2020 and 2021
- Percentage wise, hosts went from 85% in 2019 to 87.7% in 2021

Number of listings:

- The number of listings for both hosts and superhosts diminished
- Percentage rise, from 2020-2021 hosts went from 85% to 86%

## Response rate

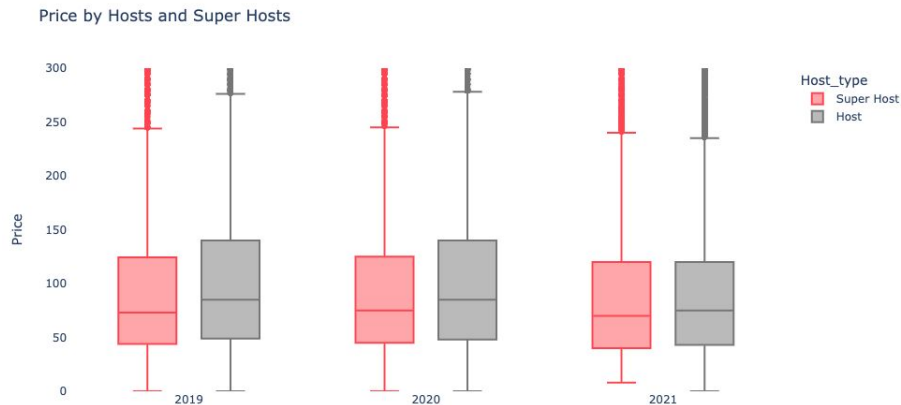

- Host: Experienced a sharp drop, falling by 6% each year
- Super Host: Dropped slightly in 2020, but remained at a consistent level afterwards

# EDA-Host Type

## Price

The prices for host and superhosts decrease in 2021, with normal hosts having a more drastic impact

## Review Score

The review scores for host and superhosts rise in 2021. However, the rise was stronger for normal hosts

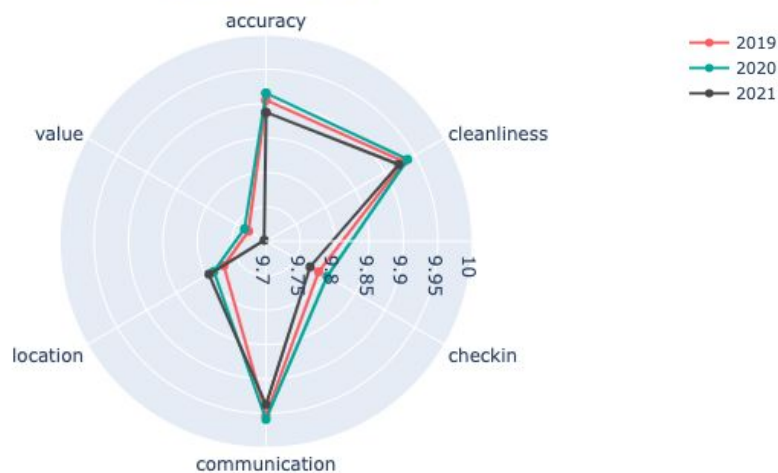

# EDA-Host Type (Category Review Scores)

## Hosts

Scores increased in all categories throughout the 3 years

## Super Hosts

In 2021, scores fell in all categories except location

# Conclusion - Opportunities & Suggestions

 <b>Market</b>	The areas in southwest London have high review scores and possess competitive price than other areas	Airbnb could increase listing properties in southwest London for planning their business development strategy in post Covid
 <b>Customer</b>	Instead of traveling far for trip, customers tend to plan their vacation nearby	Airbnb could optimize their search algorithm by prioritizing the listings with potential destination for staycation
 <b>Host</b>	The strengths of superhost are accuracy and communication	Airbnb could suggest hosts to provide sufficient information for customers and improve communication skill to become super hosts, who can get more exposures for the listing
